# Alternative Solutions, **AP** ALTERNATIVE PEST SOLUTIONS **Proven Results**

## Home Spider Control & Web-Cleaning

**INNOVATIVE - PROVEN - EFFECTIVE**

The first step is **inspection** for webbing, spider & wasp nests, peak height, and other pest harborage like overhanging limbs or shrubbery close to the home. Next is the **APS** exclusive **Web-Dusting** of the home to remove old nests and unsightly webbing. Our thorough web-removal service pays special attention to peaks, downspouts, and anywhere in the vicinity of exterior lighting. This service is performed using a special tool, **The WebSter**, to remove the webbing and insect debris.

### Precise Treatment – Effective Results

For exterior and interior spider treatment, **APS** applies a “micro-encapsulated” residual spider control material that puts the material **where the spider is** for the best results. Micro-Encapsulation allows a longer-term activity on the spiders with no damage to exterior surfaces and no odor. Because the active ingredient is repellent to spiders and other insects, it goes on working & working to protect your home. The **APS** exterior treatment is made even more effective by application with a truck-mounted hose-reel sprayer. This device allows precise application, better penetration of spider hiding places, and prevents drift & overspray of the material.

-  **Professional Inspection & Web-Cleaning**
-  **Micro-Encapsulated Material for the Best Results**
-  **Truck-Mounted Spray Rigs Mean Thorough, Yet Precise Treatment**
-  **APS Does The Web-Cleaning**
-  **No Odor!**

### Ask About The **APS** Home Pest Prevention Program – The Best Value

Consider **APS** for your complete pest prevention. Protection of your home from the target pests is year-round. The **APS-Home Pest Prevention** program emphasizes monitoring, integrates the **EPA** official **IPM** pest management process, and applies the principles of the reduced-pesticide usage philosophy of the **National Organic Program (NOP)**. This specific program is unique to **APS**, and is **environmentally** friendly.

-  **Year-Round Pest Coverage Includes Rats, Mice, Insects, Spiders, And Related Pests**
-  **Prevents Pest Presence By Exclusion And (Advised) Structural Modification**
-  **Mechanical Pest Control By Using Traps**
-  **Low-Toxicity And/Or Organic (NOP) Approved Pesticides**

**Web-Cleaning is Key to Your Homes Appearance**

-  **Thorough Inspection**
-  **Exclusive Web Removal**

**Unique Value-Added Features**

-  **Micro-Encapsulation**
-  **Power-Sprayer = Results!**
-  **No Drift or Overspray**

**Affordable Spider Web-Cleaning, Control, & Prevention!**
